Remote Vehicle Tracking

# Remote Vehicle Tracking

Out of mobile network coverage doesn't mean out of sight with TracerTrak.

Whether you work in Exploration, Mining, Oil & Gas, Remote Construction, Tourism or another remote industry, TracerTrak provides visibility over your remote vehicle fleet. Increase your operational efficiency and personnel safety by pinpointing the location of your vehicles, ensuring that they are put to the best possible use.

Satellite based solutions will provide vehicle location data and alarm information from the most remote locations, while solutions that can be vehicle powered and long life battery solutions can provide many years of service.

## Key Benefits

TracerTrak provides an Enterprise Grade solution for Remote Vehicle tracking and monitoring:

- Maintain visibility of your remote vehicles wherever they are.
- Easy to use location 'geofences' provide effective exception reporting on vehicle movements.
- Minimise time wasted trying to track down your vehicles – ensure your team is on track and on time.
- Monitor for alarm events such as "Engine on" or "Driver Duress".
- Effective Group Management provides simpler management and better visibility of large fleets of assets.
- Constant End to end network monitoring ensures greater availability of the entire tracking service.

## Improved efficiency through increased visibility.

Situational Awareness – the ability to see some or all of your resources at a glance – can significantly increase asset utilisation and reduce operational downtime. Imagine never having to wonder where your personnel or assets are, so you can utilise them quickly and efficiently instead of spending valuable time trying to locate them.

TracerTrak will show you where your vehicles are, and you can easily and quickly search which of your vehicles are closest or most suitable for you immediate requirement. Don't waste extra time and money searching for your vehicles.

## Ensure Effective Control

With an Enterprise Grade permissions management structure, you can ensure that users of the system see only those vehicles, assets and system functions that are important to their job function.

## Easily monitor your vehicle fleet across Australia and the World

With TracerTrak's highly effective Group Management structure, you can easily locate one, many or all of your remote vehicles quickly and easily. Find out where your assets are in relation to the project site or to the service and maintenance team.

## Ensure Operational Compliance

Set Geofences to make sure your vehicles are only operating in areas where they are authorised, and not in unauthorised areas such as danger zones or conservation sites.

## Maximum Reliability

As Australia's leading Mobile Satellite Services Provider, only Pivotal can ensure maximum reliability and minimum system disruption thanks to our end-to-end network monitoring. Since Pivotal owns and operates the Satellite Ground Stations, Data Network and TracerTrak application you can be sure Pivotal will keep watch while you keep working.
