

Remote Asset Tracking & Satellite Communications

Vessel Monitoring

Motion Alerts

Low Cost

Simple Installation

The XTracker GS allows you to track and monitor your vessels wherever they are located with 100% satellite technology. The compact, lightweight device is simple to install and when used with Tracertrak it gives full visibility of vessel location as well as alerting the user to any unauthorised movement.

The XTracker GS on Tracertrak provides near-real-time location information on vessels in your fleet, meaning your organisation spends less time searching for vessels and more time utilising your valuable assets.

Receive text or email messages when movement is detected

5 minute tracking intervals

Monitor assets in near real time using the Tracertrak Portal

Compact and easy to install

Satellite technology tracks beyond the reach of normal mobile network coverage

Line powered

XTracker GS Specifications
