SPOT Trace

“Incredibly compact and easy to fit to almost anything”

The incredibly compact SPOT Trace is easy to fit to almost anything and it’s on board motion sensor means it will track when it’s moving and conserve battery life when it’s not. Ideal for tracking small assets, SPOT Trace will run off a single set of batteries for several months, or you can line power it using the optional weatherproof automotive line power cable.

How to select your SPOT Trace Plan & Device Profile

Choosing a SPOT Trace rate plan and Device Profile is as simple as choosing what tracking frequency you want the device to report at while moving. The SPOT Trace Device Profiles with 5, 10, 30 & 60 minute tracking frequencies are all enabled on the Trak SPOT Trace Unlimited plan and the Extreme 2.5 minute tracking Device Profile is connected on the Trak SPOT Trace Extreme plan.

Choosing the right Device Profile is a trade-off between the frequency of location updates and battery life. The more your device updates, the more battery power it will consume if your device is not line powered.

SmartOne C & SmartOne Solar Tracking Units

Housed in a compact, rugged enclosure, SmartOne supports location tracking and two independent alarm inputs. SmartOne is delivered complete and ready-to-go making installation simple with no need for an external power source.

How to select your SmartOne Plan & Device Profile

Choose the right SmartOne Plan and Device Profile to best suit your needs. The Device Profile lets you dictate the time of your daily location report/s, the reporting frequency while moving and the time zone reference. The profile you select and how often your asset spends moving (if motion is enabled) will help you determine approximately how many location updates you will need each month when choosing a plan.

Choosing the right Device Profile is a balance between the frequency of location updates, running costs and battery life. More device updates require a larger plan and will also consume more battery power.

1. Choose your plan based on how many location updates you will require each month
