

# Remote and isolated worker safety satellite communications

SOS

Check-in/OK

Two-way Messaging

Tracking

The inReach Mini is our entry-level Garmin device that allows you to communicate from nearly anywhere in the world using the Iridium satellite network. When used with Tracertrak, the inReach Mini is a powerful monitoring and exception management tool that helps you achieve the highest standard in remote worker safety compliance using a handheld satellite connected device.

Tracertrak administrators can build their own business rules for when and how remote workers are tracked, define check-in schedules for routine reporting that 'all is ok' and define escalation rules when check-ins are missed. When serious trouble strikes, workers can initiate an emergency SOS alert, complete with their GPS location data. Tracertrak can monitor your team 24/7 and includes optional support from GEOS monitoring services.

- SOS** Dedicated SOS key with SOS lock to prevent false alarms
- Check-in** Check-in with automated missed check-in alerts
- Messaging** Send and receive text messages with global visibility on the Iridium Network
- Geofence** Geofence monitoring for entry and exit alarms
- 04** Pivotal Numbers capable - give each user their own unique '04' mobile number, simplifying messaging for Tracertrak users with a two-way device, achieving a seamless messaging experience for your organisation and worker

## inReach Mini Specifications

Dimensions	99 x 51 x 26 mm
Weight	100 g
Operating Temp	-20 °C to 60 °C
Display Size	23 x 23 mm
Display Resolution	128 x 128 pixels
Waterproof Rating	IPX7 (1m for up to 30 minutes)
Battery Type	Rechargeable internal lithium ion
Battery Life	Up to 90 hours (Sending one track point every 10 minutes)

- Iridium Connected
- Messages and track points sent via the world's furthest-reaching satellite network
  - Uses Iridium short burst data technology
  - GPS chip accurate to +/- 5 metres
  - Embedded user GPS locations in all sent messages

## inReach Coverage

The Iridium satellite network provides truly global coverage over the entire surface of the planet.

Please note: use of Satellite Telecommunications services and devices may be prohibited or restricted in some countries.
